

## Debunking the "The Saudis did 9-11" nonsense!

What Really Happened

<http://whatreallyhappened.com/WRHARTICLES/debunksaudis.php>

The official story of 9-11 is collapsing almost as fast as the Obamacare website. Most Americans are now well aware of the [strange collapse of WTC Building 7](#), the video that [captures the sound of the actual explosion](#) that initiates the collapse of WTC7, the very strange behavior of the [Secret Service as President Bush read about goats](#) at Booker Elementary School. We have all seen the photographs that confirm the [remains of demolition "cutter charges"](#) in the remains of the towers. And we all know how the [BBC reported that Building 7 collapsed 26 minutes before it actually happened](#). indicating a script was being followed (but alas, not carefully enough).

With the official story in free fall, Americans are wondering just who did this heinous deed. With the US Government itself the prime suspect, many are asking if the US Government had help from an outside nation, one with a long track record of world-changing dirty tricks.

There is a great deal of evidence that implicates the nation of Israel as a co-conspirator with the Bush administration. First, there was the [massive Israeli spy ring](#) uncovered in the United States just before 9-11, and how some of the ["Dancing Israelis"](#) arrested after being seen cheering and dancing as the World Trade Towers collapsed turned out to be Mossad spies! Then there was the strange case of [Odigo, an Israeli-owned company](#) whose New York offices received a warning about the attacks before the planes used in the attacks had even left the ground! All four of the hijacked planes departed from airport gates whose security was provided by the [same Israeli security company](#). Israel has a long track record of playing dirty tricks against the United States and other countries, including the [Lavon affair \(framed on Egypt\)](#), Israel's attack on the [USS Liberty \(initially framed on Egypt\)](#), and Israel's [smuggling a radio transmitter into Libya that was used to send fake messages](#) that tricked President Reagan into bombing Libya.

As people start to seriously examine the plethora of evidence regarding Israel's numerous perfidies it comes as no surprise that recently we have seen Israel's "useful idiots" launch a propaganda campaign to claim that Saudi Arabia was behind the 9-11 attacks, based on a lawsuit brought against Saudi Arabia by the families of the victims, and a secret report that Representatives Stephen F. Lynch and Walter B. Jones are demanding be made public; a report that purportedly claims Saudi Arabia was behind 9-11. But anyone can bring a lawsuit against anyone for anything. That does not mean the lawsuit allegations are true. Nonsense lawsuits are a reality of the modern US court system, as are lawsuits staged primarily as political and propaganda stunts, which is what this appears to be. Likewise, the report the Representatives wish to make public appears to be the US Government's attempt to "get ahead of the ball" and craft a new lie to replace the one that has failed. At the very least these two pieces of propaganda are intended to deflect interest away from Israel. At worst, it is the start of the campaign to justify military invasion of that country, just as [Saddam's nuclear weapons were the excuse to invade Iraq](#), and the more recently (and thankfully failed) attempt to justify invasion of Syria by [claiming Syria's government was gassing their own people](#).

As I have mentioned before, the best way to tell if you are being lied to is to look for what should be there but isn't. In the case of the claim that Saudi Arabia was behind 9-11, what should be

there and isn't is a *motive* for Saudi Arabia to do something like that.

George Bush had a motive to do 9-11. He needed that ["new Pearl Harbor" to enrage Americans into the century of war called for by the Project For The New American Century](#). Israel certainly had a motive to do 9-11 and frame Muslims for it, to trick Americans into siding with Israel's continued land grabs and wars against Israel's enemies, with Israel's agenda being (as it was with the Lavon affair, the USS Liberty, and the Libyan radio hoax) that Americans fight those wars for them!

Saudi Arabia does not have a history of dirty tricks, nor a demonstrated ability to carry out such deceptions. More to the point, Saudi Arabia has no motive to attack the United States. The Saudi princes have grown very rich indeed through the Petrodollar arrangement. Saudi Arabia buys many American products and weapons (\$61 billion in 2011), and unlike Israel, the American taxpayer does not have to give them the money first with which to buy those weapons. Whereas Israel constantly takes money out of the US, the Saudis pour it in! Private Saudi investment in the US economy is over \$400 billion. Saudi Arabia is a major creditor to the US Government. Exact figures are hard to find but Saudi Arabia has loaned the US Government hundreds of billions of dollars.

Saudi Arabia is not going to risk an attack on the US because all that wealth would vanish. The Saudi wealth inside the US would be frozen or seized, and the outstanding loans to the US would never be repaid. The "useful idiots" trying to save Israel by blaming 9-11 on Saudi Arabia have yet to come up with a motive for the Saudis to do something like 9-11 that risks losing all that cash.

Remember that Saudi Arabia was being framed for 9-11 right from the start. One of the accused hijackers, a Saudi Pilot named Saeed Al-Ghamdi, was [still alive after 9-11](#) and sued the US Government for defaming him.

And finally, here is some common sense that totally undermines the attempt to frame Saudi Arabia for 9-11. If Saudi Arabia really wanted to hurt the United States, they don't need to fly airplanes into skyscrapers to do it. All they have to do is ask for their money back, all at once. The resulting damage to the US financial system would make 9-11 look like a minor inconvenience in comparison.

And it would be perfectly legal for Saudi Arabia to ask for their money back.

Which is why we know that the claim that Saudi Arabia was behind 9-11 has no more basis in fact than the claim that Saddam had nuclear weapons or that Assad gassed his own people right in front of the UN chemical weapons inspectors.

As the media tries to blame Saudi Arabia for 9-11, it is worth recalling that the [Bush administration initially claimed that Iraq was behind 9-11](#) to sell the 2003 invasion, then later admitted Iraq had actually been innocent. So there is a pattern of the US simply using 9-11 as a "one size fits all" excuse to invade yet another oil rich nation.

At the very least, even if you accept the new claim that Saudi Arabia was behind 9-11, then it means the US Government was lying when they claimed Afghanistan and then Iraq were behind it! So why would you trust them now?
